DETAILED ACTION

Claims 14-26 are pending. Claims 1-13 and 27-133 are cancelled.

Election/Restrictions

This application contains claims directed to the following patentably distinct species: Claims 14-26 are directed to a method of treating a skin condition or disease comprising applying to the skin allantoin-containing composition having non-ionic emulsifiers classified in class 514, subclass, various therapeutic agents and various skin conditions.

The species are independent or distinct because the species of the compounds (therapeutic agents) listed in the claims are structurally different and the search for each species of the compounds listed would represent undue burden on the Office. Also, species of skin conditions are patentably distinct. The therapeutic agents and the skin conditions can be classified under different classes, which would represent undue burden on the Office. Applicant is required to elect a species of a non-ionic emulsifier system, a species of a skin condition (example, diabetic ulcer) and elect a species of a therapeutic agent (example, steroids) and further elect a single compound (a sub species, (example, hydrocortisone) of the therapeutic agent species elected.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, Claims 14, 16, 19, 20, 22, 25, 26 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims

Art Unit: 1617

readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Art Unit: 1617

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
